

ROSEMONT COPPER CAREER OPPORTUNITIES

THE FACTS

When Rosemont Copper begins full operations, the mine will directly hire about 400 Rosemont employees for at least 19 years. Historically, mining jobs are among the highest paying positions in Arizona, and experienced workers in the copper industry in the southwest can earn an average of \$59,000 or more per year. Rosemont Copper also offers a generous benefits package to employees and their families.

In addition, at least another 1,700 indirect service and support jobs will be created. These indirect jobs will be for contractors and vendors providing goods or services to mine operation during the nearly two decades of operation.
